### Workshop on Subjective Expectations

Arizona State University, 20-21 March 2020

Subjective expectations play a fundamental role in macro and microeconomic models. Recent work on measuring expectations and understanding expectation formation, on using expectations in econometric models, and on linking subjective expectations to actual behavior has contributed to a large advancement of the field.

We invite scholars whose research contributes to this flourishing literature to submit their manuscripts to the Subjective Expectations workshop to be held at Arizona State University. The goal of this workshop is to bring together researchers using subjective expectations in their work and to foster and stimulate the exchange of ideas.

The workshop is the sixth in a series of workshops on Subjective Expectations. Previous workshops have been held at Université Laval in Québec city (2009 and 2011), the University of Essex ([2014](#)), New York Federal Reserve Bank ([2016](#)), and CESifo in Munich ([2018](#)).

#### Keynote Speakers

Andrew Caplin (New York University)

Charles Manski (Northwestern University).
